

Superstore Sales Dashboard

Executive snapshot | Prepared from the supplied dashboard preview

HEADLINE KPIs - VALUES AS DISPLAYED

TOTAL SALES	TOTAL ORDERS	TOTAL PROFIT	PROFIT MARGIN	TOTAL QUANTITY
249.12K	557	42.03K	0.17	4K

What the dashboard is built to answer

How are sales changing over time, and where do product and regional results differ?

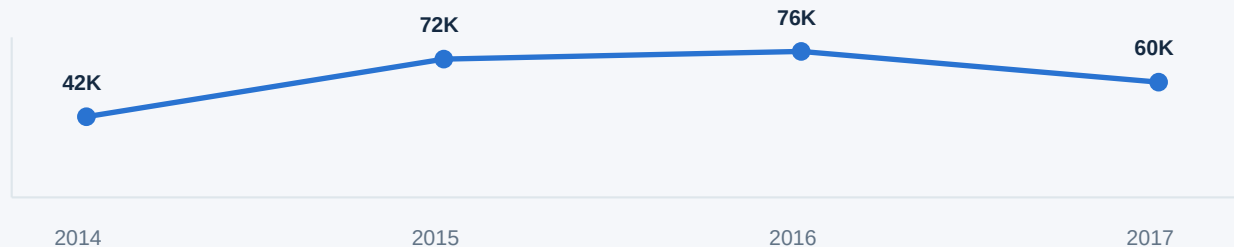

KPI cards, interactive slicers, and comparison charts make these views available in one report.

VISIBLE LEADERS - CHART LABELS

TOP CATEGORY	TOP REGION
Technology About 0.34M shown	West About 0.28M shown

Sales trend by year

Approximate values read from the line chart in the preview

FILTERS

Time (year / quarter / month) | Region | Category

At a glance

The preview shows an annual sales rise through 2016, followed by a lower 2017 result.

Technology leads the displayed category chart; West leads the displayed regional chart.

VALIDATION NOTE

The KPI sales value is 249.12K, while category and regional chart labels appear to total about 0.89M. Validate measures, filters, and aggregation context in Power BI before relying on chart totals. This visual review does not resolve the discrepancy.

Phones	125K	Machines	84K
Chairs	125K	Accessories	71K
Tables	89K	Binders	66K
Storage	85K	Copiers	59K

INTERACTIVE CONTROLS

Use the time, region, and category slicers to focus the visuals on a selected period or business segment. The preview shows each slicer set to All.

Scope and interpretation

This report summarizes the supplied screenshot; displayed chart values are rounded. It is not a source-data audit. Some chart totals conflict with the headline sales KPI. Review the PBIX measure definitions and filter interactions to reconcile them.
