

Superstore Sales Dashboard

Interactive Power BI snapshot • Sample Superstore

PERFORMANCE AT A GLANCE

A NOTE ON THE DISPLAYED TOTALS

The sales KPI reads 249.12K, while category and regional chart labels appear to total about 0.89M. Validate measures and filter context in Power BI before using the chart totals for business decisions.

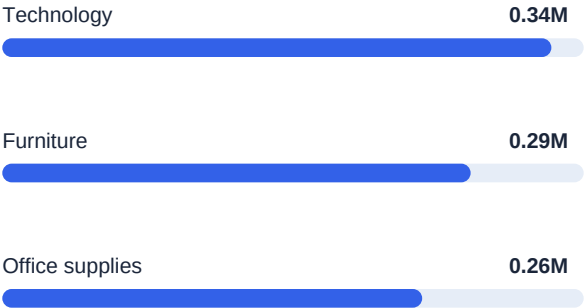

Values and observations in this report are transcribed from the supplied preview.

Explore the breakdowns

Rounded chart labels from the supplied dashboard preview

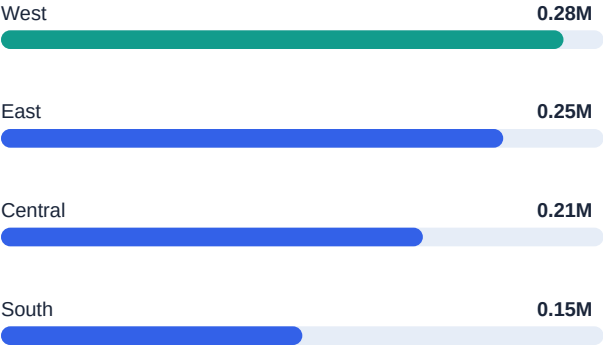

Sales by category

Technology is highest in the preview

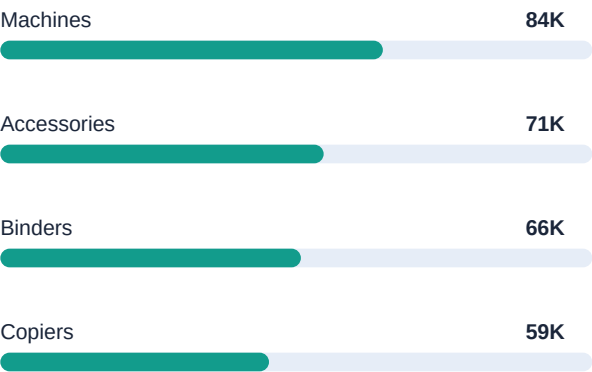

Sales by region

West leads the regional comparison

Sub-category comparison

Phones and Chairs have the highest displayed labels

FILTERS & INTERPRETATION

Use year / quarter / month, region, and category slicers to explore the report.
The preview shows all slicers at All; chart values are rounded and totals need validation against the KPI before drawing firm conclusions.
